ERP Application Developer Internship

Hiring Manager Name & Title: Scott Barge, IT Manager

Department: Applications, Development, and Integrations

Title of Internship: ERP Application Developer Internship

Brief Description of Internship:

The ERP development team is looking for an intern with experience in coding, testing, and debugging web-based applications using an object-oriented language and/or SQL. The intern will assist developers in a real-world, collaborative environment to analyze requirements, create design specifications and prototypes, develop and test new code, and document solutions.

Specific Duties:

- Assist developers in the plan and design stages for solutions based on business requirements
- Develop and test new code that maintains the integrity of the ERP system
- Document changes to new and existing code

Hours Per Week: 10 -15 hours per week

Hourly Rate: \$13.00 - \$15.00

Qualifications Needed:

- Major in Computer Science, Computer Engineering, or related field
- Proficiency in at least one object-oriented programming language (Java, C++, C#, Python, etc.)
- Excellent analytical and problem-solving skills

Learning Objectives:

- Develop an understanding of their career field of interest, including the skills, responsibilities, and career trajectory of professionals; specifically, by distinguishing key characteristics of a large-scale ERP system
- Apply application design techniques in an ERP system
- Develop interpersonal skills which will enable them to build professional relationships, work within a team structure, and to manage conflict in the workplace.
- Demonstrate openness, inclusiveness, sensitivity, and the ability to interact respectfully with all people and understand individuals' difference to complete assigned projects.
