# MULTI–FACTOR AUTHENTICATION
AT UF

WHAT IS MULTI–FACTOR AUTHENTICATION?

In 2020, UF mandated the use of multi-factor authentication for anyone accessing university-wide systems.

For UF authentication, you'll verify your identity in two steps. First, you must login with your GatorLink credentials. The second verification step will be with your device, Touch ID, a security key, or a three-digit code through Duo. — UF's vendor.

VERIFIED DUO PUSH

Download the **free** Duo mobile app for quick access to UF's authentication process. The app is available in both the Apple App Store and Google Play.

USING DUO TO ACCESS UF SYSTEMS AND SERVICES

- **VERIFIED DUO PUSH:** With a Verified Duo Push set-up, you'll get a pop-up notification on your mobile device through the Duo app. Enter the three-digit code displayed on the browser and you're good to go.

PASSWORD + **DUO** = **ACCESS**
