

Research Computing Advisory Committee

Minutes Dec 3, 2018 (taken by Erik Deumens)

Present: Paul Avery, Erik Deumens, Richard Hennig, Lauren McIntyre, Alberto Riva, Jack Stenner

Guest: Bill Hogan, co-chair of HSC Research IT Steering Committee, Alicia Turner

Discussion

The University of Florida will soon announce the details of a new policy on how information technology will be supported. Erik provides some background and sketches some of the features:

1. The guiding principle comes from the Board of Trustees and can be summarized as: To have one IT organization for one UF.
2. That means a streamlined IT structure and governance for all colleges, whether they are part of the Health Science Center or not, and it includes a tight integration with the IT support for Shands and the clinics.
3. Over the past several years a lot of unification and streamlining has already taken place: single network infrastructure at the hardware level, single wireless, single VoIP, shared licenses, etc.
4. The governance structure will be enhanced:
 - a. The Research Computing Advisor Committee (RCAC) will merge with the HSC Research IT Steering committee with co-chairs Profs Bill Hogan and Lauren McIntyre. The list of members is shown below.
 - b. A new governance committee for clinical services will be created.
5. The members of the HSC Research Steering committee will be invited to join the RCAC in Dec 2018. The first meeting in January will include them.
